

Healthy Communities by Design Summit

November 15 - 17, 2010

About the Summit:

In collaboration with Environmental Systems Research Institute (Esri), Loma Linda University School of Public Health (LLUSPH) has established the first ever "Healthy Communities by Design" Summit to be held November 15 – 17, 2010.

The summit will bring together a unique cross section of key leadership and will provide a framework for professionals to leverage geospatial thinking and health information, resulting in designs that more closely follow naturally healthy systems. Key outcomes of this summit include discussions on tools to identify vulnerable populations, ways to improve existing initiatives and conditions, and the future of building healthy communities.

Highlighted Speakers:

- **Richard Hart**, President of Loma Linda University, "Blue Zones and Our Health: Building a community environment that promotes health and well-being of its residents"
- **Jack Dangermond**, President of Esri, "Redesigning Our Communities: Building sustainable environments – moving from urban sprawl to Japanese gardens"
- **Michael Flaxman**, Assistant Professor at MIT, "Spatial Simulation Modeling in Planning and Designing Cities and Communities"
